DETAILED ACTION

- Response to the applicant's amendment dated 10/12/2007
- Amended claims 1-20 have been submitted for examination
- Amended claims 1-20 have been allowed

Response to Arguments

1. Applicant's arguments and amended claims 1, 7 and 13 filed on 10/10/2007, have been fully considered. Amendments to the claims have not overcome the rejections under section 35 **USC § 101** per the office action mailed on 7/12/2007. The applicant has agreed to the proposed Examiner amendments to the specification to overcome rejections under section **35 USC § 101** as follows.

EXAMINER'S AMENDMENT

- An examiner's amendment to the record attached to this office. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with attorney Joel Justiss (Phone: 972-480-8800) on 11/16/2007.
 3. Change claim 8, line 2 the ". When combined with a computer..." to "...when executed by a computer..."
 4. Replace section [0008] to read (changes highlighted):

[0008] To address the above-discussed deficiencies of the prior art, the present invention provides a reduction checksum generator

for calculating a checksum value for a block of data. In one embodiment, the reduction checksum generator includes: (i) a reduction unit having a plurality of reduction stages and configured to pipeline a plurality of segments of the block of data through the plurality of reductions stages to reduce the plurality of segments to at least two segments, and (2) a checksum unit configured to generate a one's complement sum of the at least two segments and invert the one's complement sum to produce the checksum value. For purposes of the present invention, the phrase "configured to" means that the device, the system or the subsystem includes the necessary **software**, hardware, and firmware ~~or a combination thereof~~ to accomplish the stated task.

5. Replace section [0025] to read (changes highlighted):

[0025] One skilled in the art should know that the reduction checksum generator 200 may have additional circuitry that is not illustrated. Also, in other embodiments, the checksum unit 230 may be a conventional checksum generator. In addition, the reduction checksum generator 200 may be embodied in hardware, **software**, and firmware, ~~microcode or a combination thereof~~.

6. Replace section [0053] to read (changes highlighted):

[0053] One skilled in the art should know that the parallel reduction checksum generator 700 may have additional circuitry that is not illustrated. Also, in other embodiments, the checksum unit 740 may be a conventional checksum generator. In addition, the parallel reduction checksum generator 700 may be embodied in hardware, ~~software, and~~ firmware, ~~microcode or a combination thereof~~.

Reasons For Allowance

7. Amendments to the claims 1, 8, and 15 and the specifications section [0008], [0025] and [0053] has overcome rejections under section **35 USC § 101**.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sam Risk whose telephone number is (571) 272-8191. The examiner can normally be reached on M-F 8-5.
